

**1996 Concrete Equipment Australia 7 Cubic Mtr & 2.5 Tonne Cement Concrete Batch Plant**

<b>Make</b>	Concrete Equipment Australia		<b>Model</b>	Concrete Batch Plant 7 Cubic Mtr & 2.5 Tonne Cement	
<b>Year</b>	1996	<b>Hours</b>			As at
<b>Mileage</b>				km	As at
<b>Serial/VIN</b>				<b>Engine Serial</b>	
<b>Details</b>	<p>1996 Concrete Equipment Australia Batch Plant designed for 7 cubic metre batch sizes and 2.5 tonne cement capacity.                  This package includes batch weigh station, feed conveyor, ~83 cubic mtr cement silo, batching control room, electric compressor incomplete parts, services shed with 2005 Champion Sullair CSF18 electric compressor serial # 9057 and 2006 Controls C34L2 Concrete compression tester with digital read out unit rate to 1500 KN.                  Site feedback on condition confirms the Silo is empty and does not contain cement, plant is in good condition but has been idle for over 2 years, at the time of shut down this plant was in fully operating condition while it will need preparation prior to going back into operation and the only noticeable change has been parts taken form the compressor making that item incomplete.</p>				

Also available 2000 Hino FM1J Concrete Agitator Truck as seen in plant photos with full details and specifications as per GES equipment report. All items are located Site Lawn Hill area via Gregory, Far Western Queensland, Australia				
<b>Asking price</b>	AUD	\$40,000 plus GST if applicable	ex site	Australia, Queensland, Gregory
